

MC 427: Social Media Analytics

Fall 2026, second eight weeks · Southern Illinois University Edwardsville · Alex P. Leith, PhD · The live version of this syllabus is at aura-lab.siu.edu/mc427/

You will learn the analytical methods AI tools automate, so you can supervise and account for them when they do. You finish with a pitch-ready campaign deck, an AI Workflow Appendix documenting how you built it, and a governance practice you can carry into the workforce.

Essential information

Item	Details
Format	Fully online, asynchronous — All lecture content is pre-recorded and posted before the module opens
When	Oct 19 to Dec 18, 2026 — Eight modules in eight weeks. Modules open Mondays.
Instructor	Alex P. Leith, PhD — Alex, AP, or Dr. Leith. He / they.
Office hours	Tu / W / Th, 3:00 to 5:00 PM — 1017 Dunham Hall, drop in. Remote by appointment. Never recorded.
Email	aleith@siue.edu — Reply within 24 hours on weekdays
Book a 1:1	Microsoft Bookings — My calendar shows you only open times

Start here: your first module

This is an eight-week course. It moves fast, and Module 1 is the setup module for everything after it. Do these five things in the first week.

1. **Take the Syllabus Quiz** in Blackboard. It is untimed, you get multiple attempts, and it is worth 6 points.
2. **Post to the Introduction Discussion** (10 points, the largest single item in Module 1).
3. **Install the stack:** VS Code, R, and GitHub Copilot for Students, authenticated, by the end of Module 1. There is a setup walkthrough screencast and a confirmation submission. Module 5 cannot be done on a phone or tablet.
4. **Pick your primary AI tool** and a second one for cross-checking, and file the AI Tool Inventory.
5. **Start your AI Use Log.** It runs through every module and it is the spine of this course, not an add-on.

Read the [AI Use Policy](#) before you submit anything. This course overrides SIUE's default prohibition: AI use here is **required**, and undisclosed AI use is still academic dishonesty.

How to reach me

The communication model in this course is built around **weekly office hours**. Those are the canonical channel for instructor-student support.

- **Office hours (synchronous, weekly)** are the primary support channel. In person Tuesday, Wednesday, and Thursday from 3:00 to 5:00 PM in 1017 Dunham Hall (drop-in, no appointment needed), or remotely by appointment through [Microsoft Bookings](#), which shows you only my open times. Office hours are never recorded, so you can speak freely about grades, accommodations, or anything else.
- **Email** (aleith@siue.edu) is for formal requests, time-non-sensitive questions, and confidential issues (grades, accommodations). Expect a response within 24 hours on weekdays.
- **Course discussion forums (Blackboard)** are the place for student-to-student discussion. I participate periodically but do not monitor continuously; bring instructor-directed questions to office hours or email.

There is no Discord channel for this section. The course's communication architecture is intentionally narrow so the channels that exist work well.

In all communication, clearly stated needs save us both time. State what you have tried, what is not working, and what kind of response you are hoping for.

About me, and how I teach

I am Alex P. Leith, also known as AP. Please feel free to call me Alex, AP, or Dr. Leith. My pronouns are he/they. I have been at SIUE since Fall 2019. I am a social data scientist that specializes in digital social platforms (livestreaming, virtual reality, and conversational AI). My research uses natural language processing across platforms ranging from Twitter to Twitch to long-form interview corpora. I am also the operator of SIM DAD LLC, a small software company that builds local-first analytical tools for researchers and strategists. AI-augmented analytical practice is the daily work I do as both an academic and a builder.

My approach to teaching is direct. I believe that students learn in many ways and that the best thing a teacher can do is be available. In an asynchronous online course, "being available" looks different than in person. It means dedicated weekly office hours, both in person and remotely by appointment, written feedback delivered on schedule, recorded video walkthroughs of common challenges, and discussion forums where I am a regular participant rather than an absentee landlord.

Department of Mass Communications, SIUE. For advising on the certificate, contact [Academic Advising](#) or your assigned advisor. Phone: +1 504 LEITH GO.

What this course is

Welcome to MC 427, Social Media Analytics, the analytical anchor of the **AI Social Media Strategist Certificate**, a joint offering of SIUE and SIUC. The certificate is designed for students who want to enter the workforce as strategists who can supervise, govern, and account for AI-augmented analytical work.

This course teaches you to use AI tools as collaborative partners for analyzing social media data and designing strategy, and just as importantly, to evaluate AI outputs with the critical eye of a strategist who is accountable for what gets posted in their name. We treat AI logging and governance as professional skills, not afterthoughts.

From the SIUE catalog. This course focuses on the use of analytics, including AI-powered tools, to evaluate and improve social media performance. Students learn to collect, analyze, and interpret data from multiple platforms using machine learning for pattern recognition and predictive analytics. Emphasis is placed on connecting metrics to organizational objectives, using insights to inform strategic decisions, and critically assessing the impact and limitations of AI in social media analytics.

Where it sits in the certificate. MC 427 is the **methodological core**: the course where you learn the analytical methods AI tools automate, so you can supervise and account for them when they do. Adjacent courses cover the workflow design that automates analytics (MC 425), creative content production (MC 328), AI advertising (JRNL 307), AI and misinformation (JRNL 438), and generative arts (AM 400).

Course goals, and how they map to ACEJMC competencies

By the end of the course, students will be able to do the following. Each goal expressly meets one or more ACEJMC professional values and competencies.

1. **Apply AI-augmented analytical methods**, including basic numerical and statistical concepts, to evaluate social media performance, audience behavior, and campaign outcomes. (*ACEJMC #7 critical thinking in research, #8 numerical and statistical concepts, #10 apply tools and technologies*)
2. **Design data-driven social media strategies** using AI tools as collaborative partners, applying tools and technologies appropriate for strategic communication work. (*ACEJMC #7, #10*)
3. **Critically evaluate AI outputs and your own analytical work** for accuracy, fairness, and ethical implications, with attention to the cultural and demographic dimensions of AI bias. (*ACEJMC #3 culturally proficient communication, #6 ethical principles, #9 critically evaluate own and others' work*)
4. **Communicate analytical findings effectively** in written, visual, and presentation forms appropriate for the communications professions, audiences, and purposes the work serves. (*ACEJMC #4 present effectively using tools and technologies, #5 write clearly for the communications professions*)

5. **Govern AI usage** through documented logging, oversight, and accountability practices that demonstrate professional ethical principles in pursuit of truth, accuracy, fairness, and service. (ACEJMC #6, #9)

The course goals above expressly meet ACEJMC competencies #3, 4, 5, 6, 7, 8, 9, and 10. Competency #2 (multicultural history of communications professionals and institutions) is lightly addressed in Module 1's landscape lecture. Competency #1 (freedom of speech and press) is primarily covered by other courses in the major sequence and is touched only tangentially in Module 3 (platform terms of service, content moderation).

ACEJMC competency coverage

ACEJMC competency	Where the course covers it
#4 Present images and information effectively, using appropriate tools and technologies	Module 6 creative briefs; Module 8 Final Pitch Deck
#5 Write correctly and clearly for the communications professions	Every written submission across all modules
#6 Demonstrate ethical principles and work ethically	AI Use Policy; Module 3 IRB/TOS; Module 4 bias work; Goal 5 governance
#7 Apply critical thinking in research and evaluating information	Modules 3, 4, 7
#8 Apply numerical and statistical concepts	Module 5
#9 Critically evaluate own and others' work	Peer review (Module 6); AI Use Log governance decisions; Final Reflection
#10 Apply tools and technologies appropriate for the profession	Central skill across the entire course
#2 Multicultural history of communications professionals and institutions (<i>lightly addressed</i>)	Module 1 landscape; institutional context of social platforms
#3 Culturally proficient communication (<i>lightly addressed</i>)	Module 4 training-data bias; brand-voice work; platform reflection

What you earn

Primary credential: the AI Social Media Strategist Certificate (Credly badge). The certificate program issues a Credly digital badge upon completion of the certificate's required courses. MC 427 is one of the courses that contributes to that badge. The Credly badge is the primary verifiable credential the program offers; it is portable, shareable, and verifiable by employers through the Credly platform.

Industry certification, recommended and optional. Students completing this course are well-prepared to earn industry-recognized social media certifications. The recommended primary pathway is the **HubSpot Social Media Marketing Certification**, offered free by HubSpot Academy and completed in roughly five hours. Submit proof of completion during or shortly after the course for a small bonus credit (+10 points). It is a professional-practice extension, not a course requirement.

Alternative or follow-on certifications, for information only:

- **Hootsuite Social Media Marketing Certification** (\$199 standard; check Hootsuite Academy for current student pricing). Strong industry recognition, covers multi-platform management.
- **Meta Social Media Marketing Professional Certificate** (Coursera subscription, roughly five months). A long-form pathway with AI-integrated curriculum and an ACE credit recommendation; suitable as a post-course continuation.

AI use policy

This course overrides SIUE's default AI policy

SIUE's default policy is that AI use is prohibited unless expressly allowed. That default is **expressly overridden for this course**. AI use here is not merely permitted, it is **required** as a learning outcome. That override is specific to MC 427; it does not carry to your other courses.

What is required.

- Use of one or more generative AI tools as collaborative partners across all major assignments.
- **Logging** your AI use in the AI Use Log that runs through every module: which tool, what prompts, what the AI produced, what you kept, what you changed, what oversight decisions you made, and why.
- **Critical evaluation** of AI outputs in your own voice. Submitting an AI output verbatim without critique earns a low grade even if the output is correct.
- **Governance discipline:** every analytical step that incorporates AI gets a documented decision about whether to accept, modify, or reject the AI's contribution.

What is not permitted.

- Submitting AI-generated work as your own without disclosure of AI involvement. This is academic dishonesty.
- Using AI to fabricate citations, data, or analytical results. The course teaches that AI hallucinates and that strategists are accountable; submitting fabricated material indicates this lesson did not land.

- Using AI to circumvent learning objectives, for example having an AI write your final reflection from your other submissions.

The strategist standard. In industry, a senior strategist is accountable for AI-augmented work that goes out under their name. The same standard applies here. You are accountable for what you submit, including whatever role AI played in producing it.

The AI Use Log assignments are formative: they exist to build the habit, not to penalize early-stage workflows. Quality of governance reasoning matters more than quantity of logged interactions.

How the course works

Eight modules, 731 points, plus an optional 10-point bonus. Assignments come in three types, and the type tells you how it is graded.

- **F, formative** — graded on completion and genuine effort. Revisable for full credit.
- **S, summative** — rubric-graded for mastery.
- **P, participation** — discussion and peer review.

Points by module, out of 731

Module	Topic	Points
1	Foundations and AI governance for the working strategist	31
2	Platforms and metrics: KPIs in the age of AI	30
3	Data collection and AI-assisted research design	60
4	Content and sentiment analysis with AI	80
5	Statistical analysis with R, VS Code, and GitHub Copilot	80
6	SMART goals and strategic application of AI creative	75
7	Strategy synthesis: SWOT, timelines, stakeholder communication	95
8	Final pitch: AI-augmented strategy presentation	280
Total	Plus an optional +10 HubSpot certification bonus	731

Module 8 is 38% of the course. That is by design and it is the thing to plan around: the Final Pitch Deck alone is 150 points. The AI Workflow Appendix opens in Module 7 and the draft peer review sits in Module 7, so neither compresses into the final week, but the deck itself is one focused week of work.

Every assignment, by module and point value

All assignments, Modules 1 to 8

Assignment	Mod	Type	Points
Syllabus Quiz	1	F	6
Introduction Discussion	1	P	10

Assignment	Mod	Type	Points
AI Tool Inventory	1	F	5
Tools Stack Setup + Confirmation	1	F	5
AI Use Log: Week 1	1	F	5
<i>Module 1 subtotal</i>			31
KPI Mapping Exercise	2	S	15
Platform Reflection Discussion	2	P	10
AI Use Log: Week 2	2	F	5
<i>Module 2 subtotal</i>			30
AI-Assisted Research Plan	3	S	50
AI Use Log: Week 3	3	F	10
<i>Module 3 subtotal</i>			60
Coding Exercise (human + AI)	4	F	15
Content + Sentiment Comparison Memo	4	S	45
Disagreement Discussion	4	P	10
AI Use Log: Week 4	4	F	10
<i>Module 4 subtotal</i>			80
Mini-Analysis Exercise	5	F	20
Statistical Analysis Memo	5	S	45
AI Use Log: Week 5	5	F	15
<i>Module 5 subtotal</i>			80
SMART Goals + AI Creative Brief	6	S	50
Peer Review (classmate's brief)	6	P	10
AI Use Log: Week 6	6	F	15
<i>Module 6 subtotal</i>			75
SWOT Draft	7	S	30
Campaign Timeline Draft	7	S	30
Peer Review (SWOT + Timeline drafts)	7	P	20
AI Use Log: Week 7	7	F	15
<i>Module 7 subtotal</i>			95
Final Pitch Deck	8	S	150
AI Workflow Appendix	8	S	50
Elevator Pitch Video	8	S	30
Final Reflection on AI Governance	8	S	50
<i>Module 8 subtotal</i>			280

Assignment	Mod	Type	Points
HubSpot Social Media Certification (optional)	n/a	Bonus	+10
Total			731

Submitting work. All submissions go through Blackboard. Most major assignments require an AI Use Log excerpt or an attached chat transcript; submission instructions specify the format.

Grading

Grade scale, out of 731 points

Grade	Points	Percentage
A	658 to 731	90 to 100%
B	585 to 657	80 to 89%
C	512 to 584	70 to 79%
D	439 to 511	60 to 69%
F	below 439	below 60%

Rubrics are checklists. You start at full credit and lose full or partial points for each item that is incorrect or missing. You are welcome to raise point disputes during office hours. In special cases, opportunities to address mistakes for partial credit are provided.

Quizzes are untimed. The Syllabus Quiz and any Blackboard quizzes in this course are untimed, and you may take multiple attempts. If any timed element is ever added, it will be announced in advance with ACCESS-coordinated lead time so that accommodations can be arranged.

Feedback timeline. Grades with feedback are posted by the Friday following the due date for formative assignments, and within 7 days for summative assignments. Final Pitch Deck feedback arrives within 48 hours of the due date, since final grades are due shortly after. Find your grades under **My Grades** in the Blackboard course menu.

Late work. Assignments are due before or on the date specified. Late assignments lose 10% per business day for up to one week. After one week, the assignment receives a zero unless an accommodation has been arranged in writing before the original due date. An eight-week course does not have the schedule flexibility of a sixteen-week course. If you are experiencing an emergency, contact me as early as possible; I work with students case by case when contacted proactively, but I cannot extend deadlines retroactively.

Rewrites. Formative assignments (type F) may be revised and resubmitted within one week of grade posting for full credit. Summative assignments (type S) with rubric scores below 70% may be revised and resubmitted within one week; the final grade for a resubmission is averaged between the original and the revised submission.

Module schedule

Eight modules, October 19 to December 18

Module	Dates	Topic	Due
1	Oct 19 to 25	Foundations and AI Governance for the Working Strategist	Syllabus Quiz · Introduction Discussion · AI Tool Inventory · Tools Stack Setup · AI Use Log Wk 1
2	Oct 26 to Nov 1	Platforms and Metrics: KPIs in the Age of AI	KPI Mapping Exercise · Platform Reflection Discussion · AI Use Log Wk 2
3	Nov 2 to 8	Data Collection and AI-Assisted Research Design	AI-Assisted Research Plan · AI Use Log Wk 3
4	Nov 9 to 15	Content and Sentiment Analysis with AI	Coding Exercise · Content + Sentiment Comparison Memo · Disagreement Discussion · AI Use Log Wk 4
5	Nov 16 to 22	Statistical Analysis with R, VS Code, and GitHub Copilot	Mini-Analysis Exercise · Statistical Analysis Memo · AI Use Log Wk 5
Break	Nov 23 to 29	Thanksgiving Break, no module, no assignments	
6	Nov 30 to Dec 6	SMART Goals and Strategic Application of AI Creative	SMART Goals + AI Creative Brief · Peer Review · AI Use Log Wk 6
7	Dec 7 to 13	Strategy Synthesis: SWOT, Timelines, Stakeholder Communication	SWOT Draft · Campaign Timeline Draft · Peer Review · AI Use Log Wk 7
8	Dec 14 to 18	Final Pitch: AI-Augmented Strategy Presentation	Final Pitch Deck + AI Workflow Appendix · Elevator Pitch Video · Final Reflection on AI Governance

On the final weeks. Thanksgiving week (Nov 23 to 29) has no module and no assignments. Modules 6, 7, and 8 each run for one week after the break, and the term ends Friday, December 18. Module 8 is a single focused week centered on the Final Pitch Deck; the AI Workflow Appendix opens in Module 7, and the draft peer review sits in Module 7, so neither compresses into the final week. Office hours continue throughout, and attendance is strongly encouraged for students with questions about the pitch deck or presentation.

Schedule subject to change with notice. See Blackboard for the current version.

Materials and technology

Textbook. This course uses an Open Educational Resource (OER) adapted from the AURA Lab's *From Vibes to Variables* methodology textbook. Until the AI Social Media Strategist edition is published, weekly readings are linked through Blackboard. There is no textbook to purchase.

Software. The course uses a mix of AI tools, social listening tools, and analytical software. All required tools are free or have free tiers sufficient for course use.

- **Generative AI:** ChatGPT (free tier), Claude (free tier), or equivalent. Pick one as your primary; use a second for cross-checking on key assignments.
- **GitHub Copilot for Students** (required for Module 5): free for verified students through the [GitHub Education Pack](#). Works as an extension inside VS Code. As of March 2026, GitHub routes student requests through Auto mode (the system selects from OpenAI, Anthropic, or Google models on each request); premium-model selection is no longer student-accessible. Auto mode is sufficient for the analytical work in Module 5, and the variability is itself useful for the governance focus of this course.
- **VS Code** with the R extension: free; replaces RStudio for the analytical work in Module 5.
- **R:** free; install separately from VS Code.
- **Canva** with AI features (free tier).
- **Social listening (free tier):** Brand24 trial, Sprout free, or Hootsuite free.

You are not expected to become an expert with any single tool. Fluency across the AI-augmented workflow, plus the discipline to govern your own AI use, is the goal.

What you need to have. A reliable computer and internet connection are required. Specific to this course:

- A webcam and microphone for the Module 8 Elevator Pitch video and remote office-hour appointments.
- A current version of a supported browser (Chrome, Edge, Firefox, or Safari), kept updated, so the AI tool web interfaces work reliably.
- If you use a pop-up blocker or a strict privacy extension, allow pop-up windows from the AI tools used in this course. Several tools open authentication or output windows that a blocker can silently suppress.
- A desktop or laptop computer for Module 5. The analytical work there (R, VS Code, and GitHub Copilot) cannot be completed on a phone or tablet.
- Storage: the course produces roughly 1 to 2 GB of analytical artifacts. Cloud storage (OneDrive, Google Drive, Dropbox) is recommended.
- Microsoft Teams installed (free for SIUE and SIUC students through the campus license).

- VS Code, R, and Copilot installed and authenticated by the end of Module 1. Module 1 includes a setup walkthrough screencast and a confirmation submission.

Technical problems are not an excuse for missed deadlines, but they can often be resolved quickly. See [Getting help](#).

Participation and interaction

Regular and Substantive Interaction (RSI) is required for distance education under U.S. Department of Education regulations. In this course, RSI takes the form of:

- A weekly announcement video from me at the start of each module.
- Weekly office hours as a live, confidential support channel: in person Tuesday through Thursday afternoons, plus remote appointments through Microsoft Bookings.
- Substantive instructor responses on each discussion forum, on a weekly cadence rather than continuously.
- Personalized written feedback on graded submissions, on the timeline above.
- Optional 1:1 remote check-ins by appointment, particularly for Module 5 (Statistical Analysis) and the Final Pitch Deck.

Your part is to engage with the course on a weekly cadence: read the assigned materials, watch the lecture videos, post to discussions, come to an office hour when you have questions, and submit work on time. Self-study is rarely sufficient for material this new; consistent engagement is the strongest predictor of a strong final pitch.

This course includes an anonymous mid-course pulse survey and an anonymous end-of-course design-feedback survey. Your responses are read carefully and shape how this course runs, both during the term and in future offerings, so please take a few minutes to complete them.

Course recordings. All lecture content is pre-recorded and posted to the module before the module opens. Office hours are not recorded: under FERPA, recording a support session where students raise grades, accommodations, or personal circumstances would defeat its purpose, so those conversations stay live and private. Elevator Pitch videos in Module 8 are recorded by students and posted to the course discussion for peer review.

Getting help

You do not need to know how the university is organized to get help from it. Find your situation on the left and start at the office on the right. If you are not sure, ask me and I will point you.

Where to go, by what you need

If you need

Start here

If you need	Start here
A deadline you cannot meet	Email me before the deadline. I work with students case by case when contacted early; I cannot extend a deadline that has already passed.
An accommodation for a disability	ACCESS , Student Success Center 1203. myaccess@siue.edu , 618-650-3726. You do not need a diagnosis in hand to start the conversation.
Help with the writing itself	The Writing Center . Bring a draft at any stage, including a blank page.
Help with the course content	My office hours first. Then the Tutoring Resource Center and Supplemental Instruction .
Finding sources	Lovejoy Library . Ask for the Mass Communications subject librarian by name; that is what they are there for.
A computer, software, or login problem	ITS: 618-650-5500, help@siue.edu . Check ITS System Status first, and search the ITS KnowledgeBase .
To talk to someone about your mental health	Counseling and Health Services , Student Success Center 0222, 618-650-2842. Appointments through Cougar Care (SIUE login).
Food, housing, or money to be short	Financial Aid and the Kimmel Belonging and Engagement Hub , Morris University Center 2027, 618-650-3180. Tell me too, if it is affecting your work in this course.
To report harassment or discrimination	Office of Equal Opportunity, Access, and Title IX Coordination (EOA), Rendleman 3316.
Help choosing courses or a major	Academic Advising , and the Career Development Center , 618-650-3708.

Services for students needing accommodations

It is the policy and practice of SIUE to create inclusive learning environments. If aspects of the instruction or design of this course create barriers to your inclusion or to accurate assessment of achievement, please contact [Accessible Campus Community and Equitable Student Support \(ACCESS\)](#) as soon as possible. Register with ACCESS online at siue.edu/access or in person in the Student Success Center, Room 1203. Email myaccess@siue.edu or call 618-650-3726.

Accommodations are not a favor and they are not remedial. Tell me what you need and we will make it work.

Cougar Care

College life can be challenging, and I support students prioritizing their mental health. Counseling is available at the Student Success Center, Room 0222. Make an appointment at cougarcare.siu.edu or call 618-650-2842.

University policies

Academic integrity

The expectations and academic standards in the [Student Academic Code \(3C2\)](#) apply to all courses at the University, regardless of modality. Plagiarism (the use of another person's words or ideas without credit) and cheating will not be tolerated and may lead to failure on an assignment, in the class, or dismissal from the University, per the [SIUE academic dishonesty policy \(3C1\)](#). Cite your data sources and collaborators.

Diversity and inclusion

SIUE is committed to respecting everyone's dignity at all times. Our classroom must be a place where students and instructors feel safe and supported. Systems of oppression permeate our institutions and our classrooms; all students and instructors share responsibility for affirming inclusion, equity, and social justice. Racism, sexism, classism, ableism, heterosexism, xenophobia, and other social pathologies will not be tolerated, and violations will be enforced in line with the SIUE Student Conduct Code. The [Kimmel Belonging and Engagement Hub](#) is a resource for students.

Pregnancy and newly parenting

This course follows [SIUE's Newly Parenting Policy \(3C15\)](#). Students may request accommodations through the Office of Equal Opportunity, Access, and Title IX Coordination ([EOA](#)).

Technology and privacy

This course uses Blackboard; review the [Anthology Blackboard Privacy Statement](#) for how your data is handled. The course also uses GitHub; review GitHub's privacy policy before creating an account.

Recordings of class content

Any recordings of class sessions are for the educational use of students enrolled in this course only. Students may not copy, share, or distribute recordings without the written permission of the instructor. Office hours are not recorded, so that conversations about grades, accommodations, or personal circumstances stay private.

Subject to change

All material, assignments, and deadlines are subject to change with prior notice. Watch the course announcements and Blackboard regularly. This page is the live version of the syllabus; if a printed copy and this page disagree, this page is correct.

Academic integrity in a course that requires AI

This course operates under a **course-specific AI Use Policy** that authorizes and requires AI use as part of the certificate program design. See [AI use policy](#) above for documentation and evaluation expectations. **The default SIUE prohibition on AI use does not apply in this course.** AI use without disclosure, or AI use that fabricates citations, data, or analytical results, remains academic dishonesty under the Student Academic Code.

Reporting an inclusion concern

Beyond the offices listed under [Getting help](#), concerns about inclusion can be directed to Lindy Wagner, Assistant Vice Chancellor for Inclusive Excellence, Education and Development, at [618-650-3179](tel:618-650-3179) or linwagn@siue.edu.

Page last updated August 17, 2026. This page is the live version of this syllabus; if a printed copy and this page disagree, this page is correct.
